

Anuj Taywade

Software Developer

Pune, India | +91 7276587797 | anujtaywade456@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

PROFESSIONAL SUMMARY

Computer Science and Engineering (AI) graduate with practical experience developing full-stack web applications and RESTful backend services using JavaScript, TypeScript, and Python. Proven track record of building, debugging, and shipping production features across the MERN stack and Django during two software development internships.

EDUCATION

G H Raisoni College of Engineering and Management

B.Tech in Computer Science and Engineering (Artificial Intelligence)

Jalgaon

Nov. 2022 – Jun. 2026

Alphonsa High School

Higher Secondary Certificate (Class XII)

2022

Alphonsa High School

Secondary School Certificate (Class X)

2020

EXPERIENCE

MERN Stack Intern

Oct. 2025 – Apr. 2026

SputnikLabs

- Developed end-to-end full-stack modules across React.js, Next.js, Node.js, and Express.js, connecting database schemas to responsive frontend views via REST APIs
- Isolated and fixed API payload mismatches and state synchronization bugs across client-server boundaries to prevent regressions in shared components
- Managed feature branches, resolved merge conflicts, and contributed to peer pull-request reviews within a collaborative Agile Git workflow

WordPress Intern

Jan. 2024 – Mar. 2024

DigiNik Solutions

- Customized WordPress themes, templates, and plugins with HTML5 and CSS3 to deliver mobile-responsive layouts across client websites
- Compressed image assets, minimized stylesheet overhead, and streamlined page layouts to reduce initial page load times on mobile and desktop devices

PROJECTS

Throttlr: Distributed API Rate Limiter | *Python, Django, Redis, REST API*

- Engineered a standalone rate-limiting service in Django using sliding-window and token-bucket algorithms to regulate per-client and per-IP request throughput
- Integrated Redis in-memory counters with atomic TTL expiration for low-latency lookups and exposed REST verification endpoints for upstream services

Real-Time Chat Application | *Express.js, MongoDB, React.js, Socket.io, JWT*

- Architected a full-stack messaging platform supporting direct and group chat channels with real-time bidirectional event delivery over Socket.io
- Implemented JWT session security, MongoDB document schemas for users and message histories, and Postman API test collections prior to frontend integration

Library Management System | *Python, Django, Django REST Framework, SQL*

- Created RESTful backend endpoints with user authentication and role-based CRUD operations for cataloging books, categories, and borrowing records in DRF
- Designed normalized relational SQL tables with foreign-key integrity constraints and configured media storage pipelines for book cover uploads

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Backend & APIs: Node.js, Express.js, Django, Django REST Framework (DRF), RESTful API Design, Socket.io, JWT Authentication

Frontend: React.js, Next.js, Tailwind CSS, Responsive Web Design

Databases & Caching: PostgreSQL, MongoDB, Redis, Relational & NoSQL Schema Modeling

Core CS & Developer Tools: Data Structures & Algorithms, Object-Oriented Programming (OOP), MVC Architecture, Git, GitHub, Postman, VS Code

Professional Skills: Code Review, Problem Solving, Communication, Collaboration
